

NICKOLAS J. S. LIVERO

Software Engineer | Full Stack Developer | Flutter, Python, TypeScript, AWS, APIs, Automation

Manaus, Amazonas, Brazil - Open to remote international roles | nickolasjl.work@gmail.com |
[+55 92 98802-3281](tel:+5592988023281) | [linkedin.com/in/nickolaslivero](https://www.linkedin.com/in/nickolaslivero) | github.com/nickolaslivero | nickolaslivero.github.io

PROFESSIONAL SUMMARY

- Software Engineer with 4+ years of experience delivering full-cycle web, mobile, backend, cloud, automation, and AI-enabled systems for production business environments.
- Built and deployed real B2B systems end to end, including frontend, backend APIs, database infrastructure, AWS deployment, DNS, CDN, load balancing, and production support.
- Strong generalist profile across Flutter, Dart, Python, FastAPI, TypeScript, JavaScript, React, Next.js, PostgreSQL, Docker, Linux, REST APIs, ERP integrations, and AWS.
- Business-focused engineer with measurable delivery impact: automated 400+ test cases, reduced manual testing effort by 60%, and reduced client manual processes by up to 70%.

TECHNICAL SKILLS

- **AI & Data:** RAG (Retrieval-Augmented Generation), vector databases (Qdrant, pgvector, Weaviate, FAISS), LLM integration (GPT-4, Claude, OpenAI, Gemini), embeddings, document chunking, semantic search, prompt engineering, LangChain
- **Languages & Frameworks:** TypeScript, JavaScript, Node.js (NestJS, Express.js), Go (Golang), Python (FastAPI), Dart (Flutter), React, Next.js, Prisma ORM, SQL, Java, C++
- **Frontend:** Flutter, React, Next.js, HTML, CSS, responsive UI, web applications, mobile applications
- **Backend:** FastAPI, Node.js, NestJS, REST APIs, API design, authentication, integrations, automation services
- **Cloud/DevOps:** AWS, ECS, ECR, EC2, S3, Route 53, CloudFront, Application Load Balancer, Docker, Linux, CI/CD
- **Databases:** PostgreSQL, Firebase, Supabase, relational modeling, migrations, data processing
- **Testing/Quality:** Python QA automation, regression testing, test pipelines, Jest, Playwright, validation workflows
- **Business Domains:** B2B software, ERP integrations, TOTVS Protheus contexts, payroll/admin systems, industrial workflows

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer and Cloud Developer <i>IPENA Consultoria / Independent Contractor - Manaus, Brazil</i>	Mar 2024 - Present
• Delivered production software for a B2B industrial software house focused on ERP consulting, TOTVS Protheus environments, API integrations, and custom web/mobile systems. • Built and launched a payroll and administrative system for a transportation company, owning frontend, backend APIs, database setup, deployment, DNS, CDN, and production infrastructure. • Deployed production workloads on AWS using ECS, ECR, EC2, S3, Route 53, CloudFront, Application Load Balancer, Docker, and Linux-based operational workflows. • Built IPENA's institutional website for B2B lead generation and credibility, deploying the static production site with AWS S3 and Route 53. • Integrated APIs and data workflows for ERP-adjacent industrial operations, reducing manual client processes by up to 70% and improving operational data consistency. • Delivered MVPs in under 30 days across Flutter, Python/FastAPI, TypeScript, Next.js, PostgreSQL, Firebase, and Supabase. • Implemented applied AI and automation workflows using LLMs, OpenAI/Gemini concepts, prompt engineering, WhatsApp integration, and data processing.	
Python QA Automation and AI Intern <i>INDT - Manaus, Brazil</i>	Jun 2023 - May 2025

- Developed and maintained Python automation pipelines for mobile systems, regression testing, exploratory testing, and internal validation workflows.
- Automated 400+ test cases and internal processes, reducing manual testing effort by 60% and improving repeatability for QA execution.
- Worked with AI models for data analysis, classification, and QA validation tasks, connecting automation outputs to technical decision-making.
- Managed Linux environments, networking configurations, VPN automation, and distributed team support workflows.
- Contributed to CI/CD-oriented validation processes combining Python, internal frameworks, data processing, and mobile system quality checks.

Jun 2022 - May 2023

R&D Scholarship Holder - Embedded Systems

State University of Amazonas (UEA) - Manaus, Brazil

- Migrated legacy Android applications from Java to Flutter, improving maintainability and enabling cross-platform delivery.
- Built React.js dashboards integrated with Python computer vision modules for industrial monitoring and embedded systems contexts.
- Delivered two functional cross-platform prototypes for research, mobility, industrial workflows, and computer vision use cases.

SELECTED PROJECTS

- **PEDLOG Payroll and Administrative System:** production Flutter/web business system with backend APIs, database infrastructure, AWS ECS/ECR/EC2, CloudFront, Application Load Balancer, Route 53, and Docker. Live: administracaopedlog.ipenaconsultoria.com.br
- **IPENA Consultoria Website:** production B2B software house website for ERP consulting, custom software, API integrations, and industrial clients. Live: ipenaconsultoria.com.br
- **SBIE 2024 LLM Accessibility Research:** published paper on a voice and LLM-based virtual assistant for visually impaired students. Link: sol.sbc.org.br/index.php/sbie/article/view/31461
- **Flutter Legacy Migration - Callidus:** migrated Java Android workflows to Flutter/Dart with cross-platform architecture and REST API integration. Code: github.com/nickolaslivero/Flutter-Project---Callidus

EDUCATION

Bachelor's Degree in Information Systems

State University of Amazonas (UEA), Manaus, Brazil - 2021 to 2025

CERTIFICATIONS

Flutter Development - Alura | Introduction to CyberSecurity - Cisco | Linux Essentials - Alura | Agile Methodologies: Scrum, Kanban, XP - Alura | IoT Applications - Samsung Ocean | LGPD Fundamentals - Fundacao Bradesco

LANGUAGES

Portuguese: native | English: advanced, comfortable in technical interviews and remote collaboration | Spanish: intermediate
