NICKOLAS J. S. LIVERO

Software Engineer | Full Stack | AWS | Industrial Systems & ERP

Manaus, Brazil - International remote roles and scoped B2B consulting
Email: nickolasjl.work@gmail.com | Phone: +55 92 98802-3281
LinkedIn: https://www.linkedin.com/in/nickolaslivero/ | GitHub: https://github.com/nickolaslivero
Portfolio: https://nickolaslivero.github.io/

PROFESSIONAL SUMMARY

- Software Engineer building and evolving production applications with TypeScript, React/Next.js, Node.js, .NET and Flutter.
- Provide software and cloud consulting through NLivero. Deliver Technos projects through the IPena Consultoria partnership, including TOTVS Protheus-integrated industrial systems and a separate Android app distribution platform.
- Combine development, QA and R&D experience since 2022 with AWS delivery and operations, working from client requirements through deployment and support.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, Dart, Python, SQL, Kotlin, Java, C#.
- Web & Backend: React, Next.js, Flutter Web, Node.js, NestJS, Express, ASP.NET Core/.NET, REST APIs, Swagger/OpenAPI.
- Data & Integrations: PostgreSQL, relational modeling, migrations, reporting, business-rule validation, ERP APIs, TOTVS Protheus.
- Mobile & QA: Flutter Android/Windows, Android Studio, ADB, UI Automator, physical-device validation, Python automation, pytest, Jest, Supertest, Playwright, Flutter Test.
- Cloud & Delivery: AWS Lightsail, S3, CloudFront, Route 53, IAM roles, Secrets Manager; Docker/Compose, Ubuntu/Linux, networking, Nginx, Azure DevOps, CI/CD, PowerShell, Git.
- AI & R&D: LangChain/LangGraph assistants (freelance); BERT classifier fine-tuning and evaluation, generative AI experiments and computer vision (R&D).

PROFESSIONAL EXPERIENCE

Founder and Independent Software Engineer

NLivero Software e Consultoria Ltda. - Manaus, Brazil
Aug 2026 - Present

- Founded NLivero; provide software engineering and cloud infrastructure consulting focused on web applications, system integrations and Linux deployments.

Independent Software Engineer

IPena Consultoria (commercial brand) - Manaus, Brazil
Mar 2024 - Present

- Built a gatehouse and maintenance-request system from scratch for Technos, working directly with the client on requirements and improvements; used Next.js/React, ASP.NET Core, PostgreSQL and Protheus APIs to replace legacy workflows.
- Built Technos' production Android distribution platform from scratch: NestJS/Prisma APIs, Next.js administration, APK catalog, targeted releases and device tracking; integrated Flutter updates with SHA-256 verification and Android installer handoff.
- Delivered features and fixes across multiple releases of an inherited production Flutter Android factory application, preserving Protheus integrations and barcode workflows on handheld scanners and tablets.
- Built Technos' Flutter Web logistics dashboard with a server-side Dart proxy for Protheus, retaining the last complete dataset during upstream failures.
- Implemented Azure DevOps CI/CD and maintainer documentation for industrial systems, supporting traceable builds, pre-production validation, and approval-controlled releases.
- Developed and deployed a production non-fiscal payroll calculation and HR administration platform with Flutter Web, TypeScript/Express and PostgreSQL; maintain monthly closing, reporting and recurring client support.
- Deployed and operated the payroll platform on AWS; migrated ECS/EC2/RDS to Lightsail/Docker/PostgreSQL to reduce cost and complexity, retaining S3/CloudFront delivery, off-host backups, and isolated restore/data-parity checks.
- Built and deployed IPena's institutional website with Next.js static export, S3/CloudFront, and Route 53 DNS.

Freelance Software Developer

Independent client engagements

- In 2024, contributed to WhatsApp assistants tailored to client contexts using Python, LangChain, and LangGraph.
- In a separate engagement, developed and delivered a Next.js/React frontend MVP for project management.
- Developed an initial offline Flutter Windows application intended to digitize service receipts and support vehicle-plate lookup, based on an automotive client's document templates.

QA Automation and AI R&D Intern

INDT - Manaus, Brazil
Jun 2023 - May 2025

- Developed Python automation for Android validation, regression testing, and internal QA execution workflows.
- Created UI Automator tests using screen XML hierarchies and widget attributes; troubleshot physical devices with Android Studio and ADB.
- Contributed to QA-focused machine-learning R&D, training, fine-tuning and evaluating BERT classifiers for test-case automation suitability; supported separate generative AI experiments.
- Used pytest, Cypress, Git, Gerrit and Jenkins in validation and code-review workflows; supported Linux environments, networking and VPN automation for distributed QA.

Scholarship-Funded Research - Embedded Systems

State University of Amazonas (UEA) - Manaus, Brazil
Jun 2022 - Jun 2023

- Migrated legacy Java Android workflows to Flutter/Dart in research prototypes.
- Built React dashboards integrated with Python computer vision modules for industrial monitoring and embedded-system research.
- Worked with data processing, classification, and model validation in academic and R&D contexts.

SELECTED PROJECTS

- Co-authored a published SBIE 2024 work-in-progress paper on a voice/LLM assistant for visually impaired students. DOI: https://doi.org/10.5753/sbie.2024.244662
- Experimental Android device-management pilot (non-production): Kotlin Device Owner agent with kiosk/allowlist policies, temporary view-only screen sessions and a NestJS/Next.js administration dashboard.
- Personal self-hosted development/preproduction: repurposed and upgraded an older laptop, configured Ubuntu, networking and Docker/Compose, and maintain project runtimes and scoped backup/recovery procedures with selected database restores documented.
- Python business applications: migrated existing systems between servers while preserving agreed behavior.

Client source code and operational data remain confidential.

EDUCATION

Bachelor's Degree in Information Systems
State University of Amazonas (UEA), Manaus, Brazil - Completed Sep 2025
